

Climate Change Workshops

Educator professional learning opportunities focused on impacts and solutions

Do you want to know more about how climate change will impact Maryland and Delaware and efforts underway to slow the rate of change? Do you want to test out some hands-on climate change activities before you use them with students? Are you interested in hearing how educators in Delaware and Maryland are including climate change in their teaching and public programming?

MADE CLEAR is offering two Saturday Climate Change Workshops in 2017

25 February 2017

20 May 2017

Our sessions will focus on current climate change science and issues. We'll share related activities for you to bring the science to your audience. The free series is open to classroom and informal educators and administrators and is designed to help you teach about climate change. A basic understanding of climate change will be helpful; session-specific background material will be provided. Attendance at both sessions is not required however the sessions are designed to complement each other.

Sat, 25 February 2017 (Snow Date: 11 March)	McDaniel College 222 Lewis Hall of Science 9:30 am - 3:00 pm	Climate Change Impacts: The Birds and the Bees Collecting and Using Data as Evidence Creating Cause-Effect Flowcharts
Sat, 20 May 2017	Eastern Shore Higher Education Center Wye Mills, MD 9:30 am - 3:00 pm	Climate Change Solutions Student Action Plans Engineering Design Projects

RSVP for the May workshop by 5/7 using the form at
